

QUATTRO Column Formwork

1 / 3 < > ↗ ↘

The column formwork which can be moved as a complete unit

Overview Technical Details

For contractors, PERI QUATTRO means enormous time-savings when using the crane because the complete column including the push-pull props and concreting platform is moved in only one crane lift. With PERI transportation wheels – if necessary – even by hand.

Time-saving

Moveable as a complete unit, can be opened and closed with the minimum of effort

Variable

For square or rectangular cross-sections in 5 cm increments with edge lengths ranging from 8" up to 24"

Safe

Concreting platform with integrated access ladder and ladder safety cage

Overview

For contractors, PERI QUATTRO means enormous time-savings when using the crane because the complete column including the push-pull props and concreting platform is moved in only one crane lift. With PERI transportation wheels – if necessary – even by hand.

Time-saving

Moveable as a complete unit, can be opened and closed with the minimum of effort

Variable

For square or rectangular cross-sections in 5 cm increments with edge lengths ranging from 8" up to 24"

Safe

Concreting platform with integrated access ladder and ladder safety cage

Technical Details

- For square or rectangular cross-sections in 5 cm increments with edge lengths ranging from 8" up to 24"
- Height adjustments up to 4.50 m in 25 cm increments with 4 different panel heights (0.50 m / 1.25 m / 2.75 m / 3.50 m)
- Panel connections when extending through ring bolts that also serve as crane suspension
- Maximum permissible fresh concrete pressure 80 kN/m²
- With working and concreting platforms as well as access ladders
