DESIGN INTENT

Outlines, sketches, or references of possible theming, exhibits, and graphics on this drawing are for design intent; to show or describe the character, scope, relationships, forms, size and appearance of the Project, major materials and systems, in general, their quality levels, performance standards, requirements, or criteria. Engineered design, means, methods, manufacture, installation, code compliance, operation, safety, and warranties are to be provided by the Contractor; including engineering documentation signed and sealed by a qualified Engineer licensed to practice by the authority having jurisdiction. The Architect/Designer's review of submittals is for the purpose of checking for conformance with information given and the design concept expressed in the Contract Documents.
