BEAM SCHEDULE

The diagram shows a cross-section of a beam with a total width of 18 inches. The top reinforcement consists of four #9 bars, with two bars positioned at each end, spaced 10 inches apart from the ends. The bottom reinforcement includes four #6x6'-0" bars along the entire length. Additionally, there are four #6 bars and three #8 bars, each with a hook, spaced at 6 inches on center. The beam has a height of 18 inches and a depth of 24 inches.
