

Project: Sherwood High School

Location: Sherwood, OR

Crew Count Averages: 90 crew onsite first 6 months, 250 crew onsite mid project, 60 last month

The 352,000-square-foot building will be constructed on a 73-acre campus and will accommodate as many as 2,400 students by the 2020-2021 school year.

Skanska has begun construction of a new \$186 million high school for the Sherwood School District in Portland, Ore., that is expected to be completed for the 2020-2021 school year. The 352,000-square-foot building will be constructed on a 73-acre campus and accommodate up to 2,400 students.

The new school, which was funded by a bond measure approved by district voters in November 2016, is replacing the current overcrowded Sherwood High School. That building will be transformed into a middle school and two current middle schools will become elementary schools. In addition to new science and technology classrooms and multiple gymnasiums, the high school will feature a 600-seat performing arts center, more than doubling the current seating capacity. The campus will also have seven sports fields and a football complex.
