

Interview

20 Possible Points

Congratulations! Your firm has been shortlisted for the DOT On-Call Sustainability Services contract. We will interview firms on Friday, February 11, 2022. We would like the format to be an open conversation between the judges and proposing team. The following are topics we will discuss. Expect that there will be follow up questions. While addressing the following questions, please reference each category and ensure each team member explains their contributions.

Your firm will have a total of 40 minutes with the judges: 30 minutes to discuss the topics below and 10 minutes for judges' feedback.

Visual aids are welcome as backup for these topics. A formal presentation is acceptable but not required.

1. Describe the biggest challenge your team faced in preparing your RFP response.
2. Based on your prior experience, what do you foresee as being a challenge to bringing deeper sustainability to DOT projects and infrastructure?
3. Discuss challenges projects may face due to regional differences.
4. Bring a topic of your choosing to discuss with the judges; this is dependent upon judge approval.
5. What topic would you like to have seen addressed in the RFP?
6. Speak to innovation technology you've seen that you would like to see explored for future DOT projects.
