

## **Oral Presentation**

### **20 Possible Points**

Congratulations! Your firm has been selected to present on Net Zero Energy Jobsite Trailers as part of Skanska's effort to provide sustainable workplaces for jobsite personnel. We would like your firm to prepare a presentation for Skanska

Your Firm will have 30 minutes with the judges: 20 minutes to discuss the topics below and 10 minutes for questions and judges' feedback.

Please have your firm present on the following:

- Present your schematic design of the trailer.
- Highlight the design elements and how they support sustainability and meet the needs of the employees
- Provide your firm's feasibility assessment. What challenges are in our way, and how can we overcome these challenges?
- Cost Implications: How would an NZE Trailer compare to a standard trailer? Where can Skanska expect to see savings or a return on investment?
- How does the trailer look and function when in use by a jobsite team?
  - In what ways could you foresee team members using this trailer that may impact its peak performance? What issues could arise and how would you troubleshoot them?
