

Oral Presentation

20 Points Possible

For this year's presentation, please use the DeafSpace Design Guidelines to assess a building on your campus that your team spends a lot of time in. With reference to the DeafSpace Design Guidelines, please highlight what your selected building does well and where it needs to improve. What retrofits and/or remodels could be done in the name of accessibility? Are there ways that DeafSpace Design will benefit all users of the building?

Your firm will have 45 minutes with the judges. 5 minutes to set-up, 30 minutes to present, and 10 minutes for feedback and transition.
