Subject: Noise Complaint in regards to Permit #B2016-0887

Dear Mr. Smith:

This letter is in response to the City's formal letter, in regards to the public noise disturbance the City has been notified of at City Council meetings related to Permit #B2016-0887. One of Hensel Phelps' goals on this project is to be a good neighbor and to do our best to minimize the impact of the project on the community. As such, we evaluated the noise concerns and have concluded that our design meets the conditional use permit requirements for noise levels at all locations around the building. Please see the attached exhibit #1 for decibel (dB) readings at various locations shown on exhibit #2. As you can see from these readings, we are within the limits of the conditional use permit and have resumed construction operations based on verbal notice to proceed from you. Please let us know if there are any further concerns related to this or any other issue as it relates to our project.

Sincerely,

HENSEL PHELPS CONSTRUCTION CO.
