IMPORTANT INFORMATION ABOUT THIS MATERIAL	
Resorts, a colored-body porcelain tile with the look of natural quartzite and limestone.	

TECHNICAL PERFORMANCE SPECS	
Rating	ABRASION RESISTANCE (The ability of a material to resist surface wear.)
High	This material has relatively high abrasion resistance. It rates as a 7 or higher on the Mohs scale. Quartzite or granite typically fall into this range. This material is less likely to scratch than marble, limestone, onyx, slate, etc.
Rating	ABSORPTION (The relative porosity of a material.)
Low	This material is virtually non-porous. No sealer is required and it is less likely to stain.
Rating	ACID SENSITIVITY (The likelihood of a material reacting to acidic foods or liquids.)
Minimal	This material is minimally sensitive to acids. It will not acid etch or lose its surface sheen when exposed to acidic liquids such as lemons or tomatoes.
Rating	FREEZE-THAW (The ability of a material to withstand freeze-thaw cycles in exterior applications.)

Beige - Stone Source

All Exteriors	Due to this material's Minimal or Moderate Absorption rating, its Abrasion Resistance rating, color fastness and tensile strength, this material is suitable for all exterior applications where freeze-thaw cycles are a concern. Use TCNA standards for setting in exteriors and consult an engineer regarding fastening systems and tensile strength required for your project.
